

## BETT Show 2010 Product summary

Video Projectors • Audio Equipment • Stage Lighting • CCTV • Access Control  
LCD / Plasma Displays • Telephone Systems • Satellite TV • Digital Signage  
High Quality Installation • Maintenance and Support Contracts • Training

Biolock, the ideal solution for security and time / attendance monitoring. Can be used to secure a single room or can be networked to cover an entire campus. Built in web server for simple setup and monitoring. Supplied with server software included for managing multiple Bio-locks.

Simple control keypad, controls projector, screen and amplifier. Ensures the same simple user interface no matter which make of equipment is in the room. Avoids the problem of 'lost' remote controls and the resulting health and safety issues of people standing on chairs or tables to operate the projector. Has built in web page so IT staff can assist the room user if required.

Metal wall box assemblies last longer than 'budget' plastic ones. Is a plastic solution really 'budget' when it has to be replaced many times? Right Angled cable assemblies reduce accidental damage from passing people and equipment. Our range of cables are affordable, robust and normally available next day.
